<i>A balanced market typically has a 3.00 to 4.00 months supply. Less than that is undersupplied, more is oversupplied.</i>													
<i>Average Sales Price changes may be exaggerated if significant amount of New Construction is reported in the MLS.</i>													
<i>Average Sales Price noted from previous year to current year should not be construed as Appreciation - it is percent of change of average sales price.</i>													
<i>Several examples of extreme sale prices occurred in MLS in 2006 that influenced value in upper bracket communities with low sales volume.</i>
