A balanced market typically has a 3.00 to 4.00 months supply. Less than that is undersupplied, more is oversupplied.												
Average Sales Price changes may be exaggerated if significant amount of New Construction is reported in the MLS.												
Average Sales Price noted from previous year to current year should not be construed as Appreciation - it is percent of change of average sales price.												
Several examples of extreme sale prices occurred in MLS in 2006 that influenced value in upper bracket communities with low sales volume.
